MEMORY POWER

The Average Person Uses Only 10% of Their Brain—Unlock Your Remaining Potential

The human brain is a complex and fascinating living computer that modern science still knows relatively little about. However, there are observable factors and techniques that can be used to manipulate your brain to your advantage.

Ellen Engel's Seminar Will Teach You Useful Memory Techniques

"I always told myself I have a terrible memory. The first exercise at the seminar was to listen and learn 20 items in order. Impossible! But, with the techniques I learned at the seminar I was able to remember much more. I realize I actually do have a good memory! --Jane Shear, World Wildlife Fund

After learning the proven techniques that will allow you to organically and effortlessly recall valuable information, you'll:

- Never lose your keys again
- Always remember that important statistic or critical business meeting
- Remember long-term facts for exams, proposals or pitches
- Shop without a list
- Keep a schedule in your head
- Limit your reliance on post-its and electronic reminders

ABOUT ELLEN ENGEL

Ellen Engel is among the nation's top life-skills trainers and one of only a handful of memory experts. Previous attendees have witnessed Ellen remember the names of all 250 people in her seminar after meeting each individual only once.
