## Using Technology in the Classroom

Inspire and enhance student learning through innovative, real world projects using technology. Participants will use online tools and interactive, digital resources to engage in collaboration and communication. Develop effective classroom management through personalized learning in a blended, 21st century environment.

### ABOUT LORI ROE

Lori Roe is the Instructional Technology Specialist for Cape Henlopen School District, in Delaware. She provides professional development for instructional technology and best practices in K-12 education. Roe has successfully implemented projects that integrate mobile learning, videoconferencing, and global education into the classroom. As a certified course developer, she has created and facilitated eLearning courses for Delaware. She developed and directed the online international student project, facing the World's Challenges, in partnership with DOE and the Peace Corps, and has participated in other global projects, such as Rock Our World. Roe is an adjunct instructor for the Masters of Applied Technology Program at Wilmington University. She has presented at national conferences, such as ASCD (Association for Supervision and Curriculum Development) and ISTE (International Society for Technology in Education). Her greatest accomplishments include receiving the Governor's Education Award for contributions in Geospatial Technologies and the honorable achievements of becoming an Apple Distinguished Educator, Certified Google Teacher, SMART Exemplary Educator, and iEducate Honoree with the Rodel Foundation. Roe's passion for teaching and learning with technology continues to inspire her advocacy for innovation in education.
