ELEARNING DEVELOPMENT PANEL

The difference in elearning trainings comes down to the style of the developer. To take a closer look at styles, we have invited a panel of e-learning developers who will demonstrate for us their process of building an online training. You will have an opportunity to ask them questions and maybe even "borrow" their ideas.

ABOUT THE PRESENTERS

Allison Gallo began her career as a procedure writer and instructional designer and she has over 10 years' experience in learning and development. She has just as much experience in creating computer-based training programs using software programs such as Captivate, Articulate Studio, and most recently Articulate Storyline. She is a CPLP (Certified Professional of Learning and Performance), which is an accreditation earned through the Association for Talent Development. The most valuable e-learning experience she has had to date is going to the ATD headquarters in Alexandria, VA and taking a course called Advanced Instructional Design for E-learning.

Jamie Summerfield is currently a Training Administrator/eLearning Developer for Statewide Training and Organization Development and is an Executive Board member of STAND. Jamie has an A.A. in Art from Camden County Community College and a B.S. in Organizational Dynamics from Wilmington University. She has been with the State of Delaware 11 years come October with the last 7 ½ years working for OMB/HRM/Statewide Training. (She started out as their department's Administrative Specialist III). In 2009, her current career path was set in to motion when she first she stumbled into the online world. She simply volunteered to assist one of the Training Administrators with developing an online course and was hooked. Since then she has become responsible for Statewide Training's online department of the creation, development, updating and publishing of online courses. Jamie consults and assists other state agencies such as DTI, DHSS, PHRST, and DOS with creating and developing eLearning. She loves, loves, loves Storyline 2 and is always looking to learn new things. Have a question, just ask her, she will help you out. And if she doesn't know the answer, she'll work with you to find it.
